Final Exam

English Language Exam.
2nd. Secondary Class .
First Semester.

Date : Jan. 1, 2018
Time : One hour and a half.
All Sections.

Name : _____.

Prepared by: Harbi Ghaidan

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

The Arab world has many famous chemists in its history, but the person who is known as the founder of chemistry is probably Jabir ibn Hayyan. He is most well known for the beginning of the production of sulphuric acid. He also built a set of scales which changed the way in which chemists weighed items in a laboratory: his scales could weigh items over 6,000 times smaller than a kilogram.

Ali ibn Nafi ' is also known as 'Ziryab' (or 'Blackbird', because of his beautiful voice). He was a gifted pupil of a famous musician from Baghdad, and it was his talent for music that led him to Cordoba in the ninth century CE. He was the guest of the Umayyad ruler there. He is the person who established the first music school in the world in Cordoba, Al-Andalus, teaching musical harmony and composition. He revolutionised musical theory, and is also the person who introduced the oud to Europe.

Fatima al-Fihri was the daughter of a wealthy businessman. She used her father's inheritance to build a learning centre in Fez, Morocco. This learning centre became Morocco's top university, and it is where many students from all over the world come to study. Moreover, it was Fatima's sister, Mariam, who supervised the building of the Andalus Mosque, which was not far from the learning centre.

Al-Kindi was a physician, philosopher, mathematician, chemist, musician and astronomer – a true polymath. He made ground-breaking discoveries in many of these fields, but it is probably his work in arithmetic and geometry that has made him most famous.

Question Number One:

A.

1. There are two titles given to Ali ibn Nafi' because of his beautiful voice. Write them down.
2. The article specifies two procedures Fatima did with her wealth. Write them down.
3. Write down two important achievements of Jabir ibn Hayyan.
4. Quote a sentence which shows that Al-Kindi was a true polymath.
5. What does the underlined pronoun "it" refer to?
6. Find a word in the text which means "money or things that you get from someone after they die".
7. Do you think that music plays a key role and has a big influence on our lives? Explain.

المعلم : حربي غيثان

SEE PAGE TWO>>>

The King Hussein Cancer Center (KHCC) is Jordan's only comprehensive cancer treatment centre. It treats both adult and pediatric patients. As the population of the country increases, more and more families will rely on the hospital for cancer treatment. Patients come not only from Jordan but also from other countries in the region, as they are attracted by its excellent reputation, lower costs, and cultural and language similarities.

In order to cope with the increase in demand for treatment, the KHCC began an expansion programme. Building started in 2011 CE. The hospital doubled its capacity in 2016 CE by increasing space for new cancer cases from 3,500 per year to 9,000.

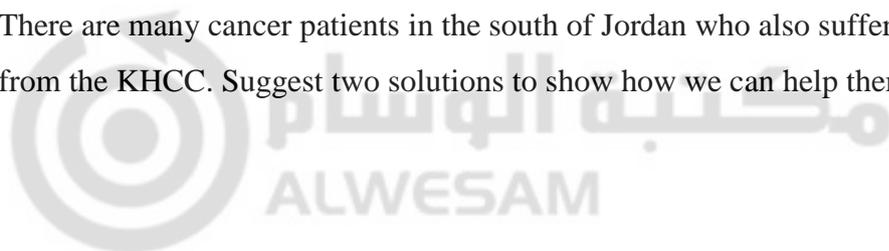

In 2016, they added 182 extra beds, along with bigger units for different departments, including radiotherapy. New adult and pediatric wards were opened. Additionally, they built a special ten-floor outpatients' building, with an education centre including teaching rooms and a library.

Many cancer patients live far away from Amman, where the KHCC is located, and the journey to and from the hospital is often difficult. For this reason, there are plans to extend cancer care facilities to other parts of Jordan. In the near future, King Abdullah University Hospital in Irbid hopes to set up radiotherapy machines, so that cancer patients from northern Jordan will not have to go to Amman for radiotherapy treatment.

Question Number One:

A.

1. There are many reasons that show why patients come from the neighbouring countries to be taken care of in the KHCC. Write down three of these reasons.
2. A lot of achievements were carried out in the hospital in 2016 to expand its capacity. Write down three.
3. The text mentions one disadvantage for the patients who come from remote regions. Write it down.
4. Write down one of the future solutions for patients who suffer from the long distance to the centre.
5. Quote the sentence which shows that there are educational facilities in the hospital.
6. What does the underlined pronoun "they", line 4, refer to?
7. What was the purpose of expansion programme?
8. Find a phrasal verb in the text which means "**to deal successfully with a situation**".
9. There are many cancer patients in the south of Jordan who also suffer from the long distance to and from the KHCC. Suggest two solutions to show how we can help them overcome the problem.

المعلم : حربي غيطان

Anger can have harmful effects on health. When you see red, your blood pressure is raised and you can suffer from headaches, sleep problems and digestive problems. However, what about positive feelings and attitudes? Until recently, scientists had not investigated whether there is a link between positive feelings and good health.

Then, in a study that had followed more than 6,000 men and women aged 25 to 74 for 20 years, researchers found that positivity reduced the risk of heart disease. Other factors influencing health included a supportive network of family and friends, and an optimistic outlook on life. The research showed that children who were more able to stay focused on a task, and who had a more positive attitude to life at age seven, were usually in better health 30 years later.

The study has been controversial. Some health professionals believe that bad lifestyle choices, such as smoking or lack of exercise, are the reason for heart disease and other illnesses, and not an individual's attitude. The researchers, while agreeing, raise the question: why are people making bad lifestyle decisions? Do more optimistic people make better and healthier lifestyle choices?

The researchers appreciate that not everyone's personal circumstances and environment make it possible to live without worry. However, they believe that if we teach children to develop positive thinking, and to 'bounce back' after a setback, these qualities will improve **their** overall health in the future.

Question Number One:

- A.**
1. There are many psychological factors that increase the risks of heart disease. Write down two of them.
 2. Find out a colour idiom and write down its meaning.
 3. Find out a word in the third paragraph which means "**believing that good things will happen in the future**", and write it down.
 4. Find a topic sentence or a sentence which acts as an introduction.
 5. Which paragraph suggests that thinking positively can lead to good health? Give two examples.
 6. According to the text, what is the thing that reduces the risk of heart disease?
 7. According to the text, why do some people make bad lifestyle decisions? Give two reasons.
 8. Find out a phrasal verb , in the fourth paragraph, which means "**to start to be successful again after a difficult time**", and write it down.
 9. Quote a sentence which shows the symptoms of anger on individual's health.
 10. What does the underlined pronoun "**their**", in the last paragraph, refer to?
 11. According to the text, the writer thinks that children's character can be distinguished in some characteristics that can help them stay in better health for a long time . Explain this statement.
 12. "He who has health has hope; and he who has hope, has everything". Do you agree with this statement? Write down your point of view.

B. Literature Spot:

Read the following quotation from "All the world's a Stage" and then answer the questions.

Then the whining schoolboy, with his satchel
And shining morning face, creeping like snail
Unwilling to school...

1. Which simile does the playwright use to describe the schoolboy?
2. How does the playwright convey the image of a boy?

B. Literature Spot:

Read the following quotation from The Old Man and the Sea and then answer the questions.

The next morning, Santiago leaves early and sails far out to sea to try his luck again. Eventually, he feels a bite on one of his hooks, and he works out that it must be a big fish, perhaps a marlin. The fish is strong, though, and does not come up to the surface. Instead, the fish swims away, dragging the old man and his boat along.

1. What evidence that Santiago is a very optimistic and determined person?
2. Find a word in the extract which means "**pulling something heavy behind you**".

Question Number Two:

A. Choose the suitable item from those given to complete the following sentences.

sceptical, headlines, renewable, red-handed, self-confidence, ailment, smartphone, polymath, symptoms, arithmetic, immunise, desalination, sculpture, footprint, neutral, free, public transport ,contemporary, physician, medical trials, dementia, alien, viable, conventional, migraine, taken, got, acupuncture, take place, season, email exchange, sanitation, social media, pedestrian, spend, visual.

Money

Money is very important for human beings to help them live in a high standard of living. It is essential for food, shelter, clothing and other needs.

Many people believe that money is the root of all evil. On the contrary, we all agree that money is the core of living. It brings us happiness, satisfaction, stability and life.

In many poor countries, millions live in miserable conditions because of lack of money and so they are suffering from extreme poverty. They are deprived from happiness, dignity and a sense of living; therefore, their future is unknown.

For those who earn money by illegal means by committing robbery, murder and cheat to become rich due to greed of wealth, this does not give them happiness and the peace of mind.

Consequently, we should all have the responsibility for spending money wisely and rationally to meet our needs. It should be spent for good not evil and it should be looked at as a way that achieves us happiness, dignity and prosperous life.

My future career

I have chosen a career in education because I believe that it is one of the most important jobs in our country.

A teacher has the opportunity to make a difference and to change the future. Many of my great teachers have become my heroes. So, I want to follow their examples and get strength, knowledge, skills, values and experiences.

I want to become a teacher in order to inspire my students who will represent the future of our great country.

An invitation letter

Dear Sami,

Since you have finished your final exams at school, I have found it an opportunity to invite you to visit me in my country, Jordan.

I have put a full programme including playing different games and visiting some beautiful and historical places such as Petra, Jerash, Roman Theatre and others. Besides, we can spend a lot of time enjoying nature. You will be introduced to people of Jordan. You will like them because they are hospitable, respectful and appreciative people.

I would like to inform you that my holiday begins soon.

So, try to come quickly as you can.

Sincerely Yours

H.G

The role of technology in communication

Technology makes communication more fitting. However, there will likely be misunderstanding.

On the one hand, it helps us to connect people, family and friends all over the world. On the other hand, it might sometimes be a waste of time. In addition, it makes communication faster and easier. As a result, it might be used to offend and upset people if we misuse it.

Also, it urges us to use social media to check our works, chat, send and receive emails ...etc. Whereas, it is unsuitable for some people who lack experience they need to communicate and use technology in the right way.

المعلم : حربي غيظان

Advantages and disadvantages of the "Internet of things"

To tell the truth, life would be easier and comfortable, but we would have less privacy because everything we do will be tracked.

Besides, driverless cars would make travelling simple, but if they went wrong, they would be very fatal. At home, lights and heating would go on / off automatically. Therefore, we would save a lot of energy.

Although "Internet of things" sounds useful and exciting, it will allow techno-criminals to control our systems.

المعلم : حربي غيظان

Learning a foreign language

Nowadays, everyone knows that learning a foreign language has become necessary in the world.

First, learning a foreign language provides the brain with beneficial exercise which improves memory. Besides, it challenges the brain by making it recognises different language systems. Moreover, learning a foreign language allows you to travel wherever you want without any problems. Furthermore, having a good knowledge of different languages could help you to find jobs. Also, knowing a foreign language helps you to make new friends and meet some interesting people.

It also improves problem-solving and decision-making skills. It helps the user to understand others' languages. For me, learning a foreign language opens the gates of jobs for you.

المعلم : حربي غيظان

نص قد يصلح لكتابة بعض المواضيع

Today, I am going to write about -----اسم الموضوع-----

No one is perfect because everyone has his own advantages and disadvantages as we can see in this essay which has, on the one hand, the advantage of -----تكتب حسنه واحده تتعلق بالموضوع-----and , on the other hand, the disadvantage of -----تكتب سيئه-----.

In general, I believe it will help people and enrich their knowledge and affect them positively if they have taken its positive features.
