Final Exam

English Language Exam.
2nd. Secondary Class .
Second Semester.

Date : Jan. 1, 2018.
Time : One hour and a half.
All Sections.

Name : _____.

Prepared by: **Harbi Ghaidan**.

Read the following text carefully, then answer the questions that follow. Your answers should be based on the text.

In England, almost 50% of school leavers go on to higher education. The figure has not always been as high as this. Twenty years ago, it was closer to 30%, and thirty years before that, it was only about 5%. Another huge change has been financial. Before 1998 CE, higher education in the UK was completely free for UK citizens. Since then, tuition fees have been introduced. Most students borrow this money from the government. They don't have to repay it immediately. Instead, they pay it back slowly out of future earnings.

Despite the high cost, most students choose to study away from home. A recent survey of 17,000 students revealed that only 7% wanted to stay at home while they studied for their degree. Of course for most young people, living away from home means borrowing even more money from the government. So why don't students choose to avoid debt by staying at home, where they don't have to pay rent?

Most of them say that they want to move to the university of their choice, rather than the nearest one. Another strong motive is the desire to live in a new culture. Where do these students live? Many have rooms in halls of residence, especially in their first year; others rent flats or houses. A lucky minority live in property that their parents have bought for them. Most of them need to learn to cook, do their own washing and manage their time and money.

Question Number One:

A.

1. There are two changes took place in England relating to higher education over 50 years.
Write them down.
2. How can students of higher education pay money back out of their future earnings?
3. Most students prefer to study outside home instead of inside for many reasons.
Write down two of them.
4. Quote the sentence which indicates that local students don't have the decision to choose to study in their near universities.
5. Find a word in the text which has the opposite meaning of the word "majority".
6. What does the underlined pronoun "it", in the first paragraph, refer to?
7. Find a word in the last paragraph which means "accommodation".
8. According to the text, the writer thinks that British government introduces facilities to British students to complete their higher education. Explain this statement justifying your answer.
9. If you were given the choice to study inside or outside home, what would you choose?
Why? Why not? Explain, giving your point of view.

Read the following text carefully, then answer the questions that follow. Your answers should be based on the text.

Our country has a high standard of education. **This** is mainly due to the fact that the government considers education a necessity. All schools, from kindergarten to secondary, are the responsibility of the Ministry of Education (MOE). Pre-school and kindergarten education is optional, followed by ten years of free, compulsory education. For higher education, students enter university, either for academic or vocational courses.

Students can attend one of ten public universities, or one of nineteen private universities. A large number of Jordanian students choose to study at these institutions, as well as foreign students from all over the world. These are undergraduates studying for a first degree, or postgraduates studying for a Master's degree, a PhD or a higher diploma.

The three universities with the most undergraduates are the University of Jordan in Amman, Yarmouk University in Irbid and Al Balqa Applied University in Salt. These are all public universities. An example of a newer university is the German-Jordanian University in Amman, which was set up in 2005 CE. It is a collaboration between the MOHE and Germany's Federal Ministry of Education and Research, and it follows Germany's model of education in Applied Sciences.

For students who wish to complete their university studies while working at the same time, it is also possible in some Jordanian universities to enroll onto online distance learning programmes. In the future, this option will become available in many other universities.

Question Number One:

A.

1. According to the text, basic education in Jordan has two characteristics. What are they?
2. Jordanian Universities give many postgraduates degrees. Write down two of them.
3. Write down two reasons to show why was the German-Jordanian University established?
4. Quote the sentence which shows that only three universities are operated and funded by the government.
5. Quote the sentence which indicates the reason why Jordan enjoys an excellent level in education.
6. Quote the sentence which shows that not only Jordanian students who can join and study at universities.
7. Find a word in the text which means "**to officially arrange to join a school or university**".
8. Find a word in the text which means "**your choice**".
9. What does the underlined pronoun "**This**" refer to?
10. The writer says that online distance learning has become available and possible in some universities. Think of this statement and give two possible advantages for this kind of learning.

My name is Fatima Musa and I have worked as an interpreter for five years. Many students have emailed me about my work because they want to know what it would be like to do my job. So here is my reply.

I have always been fond of languages. My father worked in many different countries when I was young and we usually travelled with him. When we visited a country, I always wanted to learn the language. At school I was very good at English. Therefore, I decided on a career as an interpreter.

My job now involves going to important conferences and seminars around the world. When a person speaks in English at a conference, I listen to what **they** say through headphones. I then translate into Arabic while the speaker is talking. I give the translation through headphones to other people at the meeting. This means that anyone in the room who speaks Arabic can understand what people are saying.

Is it an easy job? Not at all. English is not the same in all English-speaking countries. For example, the English words that are used in India are sometimes different to the words that people use in the UK, the USA or Australia. As well as knowing regional English, you also need to know a lot of specialist language. Some of the words that are used to talk about business, science or law, for example, make it almost a different language!

Unless you have a language degree, you will not be able to become an interpreter. Provided that you have a postgraduate qualification, you will probably get a job as an interpreter quite quickly. If you get an interview for a job, you will need to show that you have good listening skills and a clear speaking voice. You will also need to show that you can think quickly and that you are able to concentrate for long periods of time. If you are successful, it is a secure and rewarding job. You will probably need to travel a lot, but that is not a problem as long as you enjoy visiting other countries.

It is a very responsible job. I am aware that if I translate things badly, it could affect an important law or trade agreement between countries. However, you get a huge feeling of satisfaction when you know that people understand everything that you translate.

Question Number One:

A:

1. There are many reasons that make interpretation a very hard, difficult and challenging job. Write down two reasons.
2. Write down two conditions under which a person can get the job as an interpreter.
3. A good interpreter must have some exclusive features if he wants to get the job. Write down two.
4. Write down two advantages for the job of an interpreter.
5. Quote a sentence which indicates that Fatima has an affection for languages.
6. Find a word in the text which means "**giving personal satisfaction**".
7. Find an example of a gender-neutral word.
8. What does the underlined pronoun "**they**" refer to?
9. The writer says that the job of an interpreter is a very responsible job. Explain.

B. Literature Spot:**PAGE TWO**

Money

Money is very important for human beings to help them live in a high standard of living. It is essential for food, shelter, clothing and other needs.

Many people believe that money is the root of all evil. On the contrary, we all agree that money is the core of living. It brings us happiness, satisfaction, stability and life.

In many poor countries, millions live in miserable conditions because of lack of money and so they are suffering from extreme poverty. They are deprived from happiness, dignity and a sense of living; therefore, their future is unknown.

For those who earn money by illegal means by committing robbery, murder and cheat to become rich due to greed of wealth, this does not give them happiness and the peace of mind.

Consequently, we should all have the responsibility for spending money wisely and rationally to meet our needs. It should be spent for good not evil and it should be looked at as a way that achieves us happiness, dignity and prosperous life.

My future career

I have chosen a career in education because I believe that it is one of the most important jobs in our country.

A teacher has the opportunity to make a difference and to change the future. Many of my great teachers have become my heroes. So, I want to follow their examples and get strength, knowledge, skills, values and experiences.

I want to become a teacher in order to inspire my students who will represent the future of our great country.

An invitation letter

Dear Sami,

Since you have finished your final exams at school, I have found it an opportunity to invite you to visit me in my country, Jordan.

I have put a full programme including playing different games and visiting some beautiful and historical places such as Petra, Jerash, Roman Theatre and others. Besides, we can spend a lot of time enjoying nature. You will be introduced to people of Jordan. You will like them because they are hospitable, respectful and appreciative people.

I would like to inform you that my holiday begins soon.

So, try to come quickly as you can.

Sincerely Yours

The role of technology in communication

Technology makes communication more fitting. However, there will likely be misunderstanding.

On the one hand, it helps us to connect people, family and friends all over the world. On the other hand, it might sometimes be a waste of time. In addition, it makes communication faster and easier. As a result, it might be used to offend and upset people if we misuse it.

Also, it urges us to use social media to check our works, chat, send and receive emails ...etc. Whereas, it is unsuitable for some people who lack experience they need to communicate and use technology in the right way.

Advantages and disadvantages of the "Internet of things"

To tell the truth, life would be easier and comfortable, but we would have less privacy because everything we do will be tracked.

Besides, driverless cars would make travelling simple, but if they went wrong, they would be very fatal. At home, lights and heating would go on / off automatically. Therefore, we would save a lot of energy.

Although "Internet of things" sounds useful and exciting, it will allow techno-criminals to control our systems.

Learning a foreign language

Nowadays, everyone knows that learning a foreign language has become necessary in the world.

First, learning a foreign language provides the brain with beneficial exercise which improves memory. Besides, it challenges the brain by making it recognises different language systems. Moreover, learning a foreign language allows you to travel wherever you want without any problems. Furthermore, having a good knowledge of different languages could help you to find jobs. Also, knowing a foreign language helps you to make new friends and meet some interesting people.

It also improves problem-solving and decision-making skills. It helps the user to understand others' languages. For me, learning a foreign language opens the gates of jobs for you.
